

Pershing Rifles To Host Drill Meet This Weekend

UK's Pershing Rifles will be host to the Regimental Drill Meet Friday and Saturday. The drill meet, featuring representatives of the 17 member schools, will be climaxed by a presidential review before Dr. Frank G. Diekey at 5 p.m., Saturday.

"A feature of the meet," Pete Davenport of the UK Pershing Rifles company said, "will be the Civil War battle between UK and Ohio State. The schools' teams will engage in the 1839 manual of arms and stage a mock battle."

The drill teams will participate in straight squadron and platoon drill in addition to the individual and special categories. "Several of the schools will bring special exhibition squadrons and platoons. There will be several girls' drill teams here," Davenport said.

The meet will take place on

the intramural field beside Stoll Field.

"Each team will be allowed a 15-minute drill sequence on which to be judged," Davenport said.

The competing teams come from the Ohio-Kentucky-Illinois-West Virginia region. They will include the Universities of Akron, Toledo, Dayton, Cincinnati, and Kentucky, Central State College, Eastern Kentucky State College, and West Virginia State College.

Bowling Green State, Kent State, John Carroll, Youngstown, Xavier, Ohio State, Ohio, Marshall, and West Virginia Universities.

DR. MERL BAKER

KRF Head Takes Post At Missouri

Dr. Merl Baker, executive director of the Kentucky Research Foundation, resigned Friday to become dean of the faculty at the University of Missouri School of Mines and Metallurgy.

His resignation becomes effective April 31.

Dr. Frank G. Diekey, president of the University, told the Board of Trustees that the appointment had been made. Dr. Baker, probably would receive a higher salary position with the University of Missouri than he now has.

Dr. Baker, who has been executive director of the Kentucky Research Foundation since 1958, has been a member of the faculty of the University of Kentucky since 1954.

Dr. Gladden Named Professor Of Month

Dr. James W. Gladden, professor of sociology, has been chosen "Professor of the Month" for April by the members of the Phi Kappa Tau fraternity.

He received his bachelor's degree from Wayneburg College and his master's and Ph.D. from the University of Pittsburgh.

Dr. Gladden came to the University in 1949 as an assistant professor of sociology. He teaches courses in The Family, Sociology of Religion, and Introduction to Sociology.

His specialty is family life education and preparation for marriage. He has given numerous lectures and has spoken at three dozen colleges.

Dr. Gladden has written regularly for college magazines and was editor of "Mosaic" magazine, a Methodist publication for two years.

The "Professor of the Month" award is given monthly to some professor when the chapter feels he has made an outstanding contribution to the University and who has worked with his students personally.

SINCE 1928

Funds Given For Mexican Study Plan

Dr. Albert Wilson Sayre, professor of history, has received \$1500 from the National Endowment for the Humanities to study in Mexico.

Dr. Sayre will spend the summer of 1963 in Mexico, studying the history of the country.

Dr. Sayre has been a member of the faculty of the University of Kentucky since 1954.

Dr. Sayre has been a member of the faculty of the University of Kentucky since 1954.

12 COLLEGES ATTEND GDK CONFERENCE

Twelve colleges from the Ohio Valley area attended the Ohio Valley Greek Day Conference held at the University of Kentucky.

A. J. D. Hitchcock, president of the conference, said that the conference was held at the University of Kentucky on Saturday morning and closed after a luncheon Saturday afternoon.

"We hold a regional conference when there isn't a national conference scheduled," said Dr. Maurice Clay, Professor of Physical Education and the national administrative secretary of Omicron Delta Kappa.

"The discussions this year dealt with the problems faced by universities in selecting candidates

for membership in GDK," he said.

Dr. Dale Foster from Western Michigan University presided over the conference this year, attended by approximately 42 members.

Preparations were also made for the 50th anniversary conference of the organization which will be held in Roanoke, Va. next year.

Republicans To Meet

The University Young Republican Club will meet tomorrow. Mrs. W. C. Cruse will speak to the club on "The Present State and the Future Development of the Kentucky Republican Party."

Due to the recent death of the chairman, she is now holding the office of Chairman of the Kentucky Republican State Committee. This is the highest official position in the state's Republican Party.

Mrs. Cruse has also served as Senator Thurston B. Morton's Field Representative for two years.

Gate Crashing Challenges Skill

By JEAN SPRAIN WILSON
AP Newsfeature Writer

NEW YORK (AP)—The man who can afford everything, including the high tariff of benefit tickets, is among the freeloaders at charity balls this year.

For him gate crashing is a challenging, thrill-packed game, claim those whose duty it is to seek out and tactfully remove the unwelcome from social events.

The blue-blooded have taken up the pastime just as the thousands of regulars have begun to lose touch, they say.

Young college boys, Ivy League generally, are devotees of the new game. But so are many adults clad in tuxedos and top hats.

The crashers slip through the back door with the delivery man. Or they literally push through the front in the pocket of a waiter, for a moment lose the tickets, and disappear in the throng.

Or they simply hatch out the ticket-taker with the "have-you-quit-yet" approach. This bold approach is absolutely essential for success, claims Emmett Davis, a social public relations director. He participated in more charity balls than he cares to remember.

The blue-blooded gate crasher may later lead a check to cover the price of the unwelcome tickets, adds Edward Seay, another busy socialite publicist.

But not always.

"Still, the chaps at the door aren't fooled every time even though they may pretend to be," says Seay.

"These people are usually such good society that they are recognized. They could be on anyone's guest list, if they wanted it. Sometimes, if the party is rather dull, the hosts really hope for an interesting gate crasher."

Seay, a 30-year-old points out, the game is played on both sides.

To bar him from a ball and then to let him in is the challenge of the game. The Ivy League men, however, are well-versed in the art of gate crashing.

"But the Ivy League men are the most sophisticated of the gate crashers," says Seay.

One of the Ivy League men, a 20-year-old, is a member of the Phi Kappa Phi Honor Society.

He is a member of the Phi Kappa Phi Honor Society and is a member of the Phi Kappa Phi Honor Society.

Seay, the publicist, says that the gate crashers are usually the most sophisticated of the gate crashers.

These gate crashers are usually the most sophisticated of the gate crashers. They are usually the most sophisticated of the gate crashers.

Eventually, they are found out because the legitimate press squeals on them. "It burns them up to see a phony posing as a reporter," Davis points out.

One of the most famous New York hotels keeps a rogue's gallery of secretly furnished uninvited guests to guide their detectives.

Feminine intuition helps hotel publicist Gail Benedict to ferret out the pretenders.

Nevertheless, the latest display of gate crashing was a hand-drawn card from any one of the three. It was in the name of a publicist, a member of the Phi Kappa Phi Honor Society, and a member of the Phi Kappa Phi Honor Society.

Seay, the publicist, says that the gate crashers are usually the most sophisticated of the gate crashers.

These gate crashers are usually the most sophisticated of the gate crashers. They are usually the most sophisticated of the gate crashers.

Set A Date

We were indeed pleased with the decision of the Board of Directors of the Athletic Association favoring the integration of University athletic teams. This placed the University on record as being in favor of equal opportunities for all students to take part in UK athletics "as a matter of principle and policy."

At the same time, however, we wish the board had set a date for recruiting of Negro athletes to begin.

The board's statement that it "believes integration of UK teams can and should occur at the earliest time taking into account our conference obligations" leaves a loophole which opponents of integration can use as grounds for stalling.

We strongly recommend that the University announce it will begin recruiting qualified Negro athletes this fall. If this plan were adopted opponents of integration would have two years' notice before Negroes would be eligible to play in varsity competition.

Just what are "our conference obligations" in regard to playing of Negroes? Certainly they are not legal obligations. There is nothing in the

charter of the Southeastern Conference which states that the playing of Negroes by member teams is forbidden.

We view the plan as a dangerous one which can be used as a check for a liberal approach to integration and for further placing the Southeastern on record as having demonstrated their opposition against Negroes.

Perhaps this term "conference obligations" refers to the so-called "20th-century agreement" through which SEC members have refrained from recruiting Negroes since 1951.

Gentlemen like this we don't need.

Again we strongly urge Dr. Dickcy, the Board of Trustees, and the Board of Directors of the Athletic Association to do all in their power to begin a program of recruiting Negro athletes at the University, starting this fall.

Kernels

"Men may be born free; they are not born wise, and it is the duty of the university to make the free wise . . . it is the dwelling place of the free mind." —*Adlai Stevenson.*

LETTERS TO THE EDITOR

Congratulates Lane

First of all, I want to say that the Student Congress did a very good job. I am proud to be a member of it. I wish to congratulate Mr. Lane on his winning the meeting. If the members of Student Congress do not care enough to come to a meeting which was announced as important on the *Kernel* and on post cards telling of the meeting, then the congress ought to be dissolved. Personally, I don't believe that in an election now that we would find 25 percent of the students voting or caring anything about voting.

Something needs to be done about Student Congress. What I don't exactly know. Even though the constitution was revised about two years ago, it is still not what we want. For one thing, the assembly is too large. Marilyn Meredith, who has just returned from the Southern University Student Government Association conference at Louisiana State University, stated that the University of Kentucky has the largest assembly of any of the 50 schools represented, much larger than most of the rest. Approximately 100 members is too large a number. Not only that, the members are not divided equally among the colleges. With this many positions available, most of the members are and can be elected by only having their names put on the ballot.

I am of the opinion that the pres-

ent method and method of electing representatives should be discontinued. I think that Mr. Gifford Blanton, the Student Congress advisor, would have a very good idea for a better way. At the present time a student in the congress does not really represent anybody but himself (his name and picture get in the *Kernel*). In most cases he did nothing to get elected and does nothing after elected except stay away from meetings. To be a good Student Congress representative, one must work for his position, be willing to work, volunteering his services, and must be honored for being a member. The position must mean something to him and be respected by the student body.

Should we set up a senate consisting of the officers of the various classes which will be elected by each respective class, or should a governing body be set up consisting of delegates from the fraternities, sororities, residence halls, etc., or what? Let's hear some views concerning this matter or else let's dissolve Student Congress once and for all. President Lane has done a tremendous job along with a few others, including Joe Coughlin, Lockie Overby, and Jackie Robinson, but the congress has not been behind them, and without its support, they can do nothing. I for one call for a new student government with a smaller assembly and the representatives elected in a different way.

Bright Picture Painted For June Graduates

EDITOR'S NOTE: This is the second and the last in a series of articles concerning job opportunities for graduating seniors.

By The Collegiate Press Service

WASHINGTON — Secretary of Labor W. Willard Wirtz has painted a generally bright picture ahead for the estimated 440,000 American college students who will receive their degrees in June.

Wirtz also noted that the future is exceptionally bright for the estimated 95,000 students who will be awarded graduate degrees.

In an open letter being prepared for 1963 college graduates, Wirtz says that the largest graduating class in the nation's history will find more jobs at better salaries than ever before. Getting priority in demand—and in pay will be graduates in science and technical fields.

Industries consuming the 850 billion spent annually for the employment of defense needs are battling for graduates in the nation, and private industry is also looking for graduates in science, engineering, and business. "The demand for graduates is so great that it is almost impossible to meet it," Wirtz said.

Wirtz noted that money holding the same dollars is their main competitor will still get less money for their work in most industries, but said the situation is improving. He cau-

tioned graduates not to be overwhelmed by high starting salaries when they are offered. "It's more important," he said, "to find the kind of work which is suited to your aptitudes, training, and long-term interest."

The Labor Secretary noted that severe teacher shortages still exist, and that new people are badly needed in almost all fields connected with health, education, and welfare.

Salaries and positions in almost all cases will be far better for those with graduate degrees. Wirtz urged all who are capable to go on to graduate work. "If you can continue on in graduate school," he said, "by all means, do it. And keep in mind scholarships, loans, and other forms of assistance to help you pursue advanced study."

Here's how the Labor Department breaks down job opportunities for June grads.

Journalism—Numerous openings, both in advertising and in the news. "The demand for graduates in journalism is so great that it is almost impossible to meet it," Wirtz said.

Public Administration—Many openings in government service, particularly in the field of social work, health, and education.

Business—Many openings in business, particularly in the field of sales, marketing, and management.

Social Sciences—Good openings in the field of social work, health, and education. "The demand for graduates in social sciences is so great that it is almost impossible to meet it," Wirtz said.

Economics—Very good employment opportunities for graduate degrees in economics in government work and industry.

Political Scientists—Who specialize in public administration and finance are very much in demand. Increasing employment in teaching and research.

Psychologists—With Ph.D.'s are very much in demand in almost every field of specialization and in virtually all parts of the country. But grads with less than a Ph.D. may find themselves hunting for jobs.

Social Work—Grads will find many chances for jobs in settlement houses, YMCA, YWCA, city agencies handling public assistance programs, child welfare services, and medical and psychiatric fields.

Health Professions—Shortages are reported in most all medical professions, particularly in the field of nursing. "The demand for graduates in health professions is so great that it is almost impossible to meet it," Wirtz said.

Education—Many openings in the field of education, particularly in the field of teaching and research.

Engineering—Many openings in the field of engineering, particularly in the field of mechanical and electrical engineering.

Science—Many openings in the field of science, particularly in the field of biology and chemistry.

Liberal Arts—Many openings in the field of liberal arts, particularly in the field of history and literature. "The demand for graduates in liberal arts is so great that it is almost impossible to meet it," Wirtz said.

Nurses—are in great demand, and those with extensive college training will find many opportunities in administrative and supervisory work, as well as in teaching. There continues to be a widespread demand for medical technicians, physical and occupational therapists, dietitians, medical librarians, and other health workers.

Performing Arts—Musicians, singers, and dancers with college degrees stand a better chance to get good jobs than those trained only as performers. Teachers in these subjects are in demand on all levels. But inexperienced persons will find great difficulty breaking into this field.

Civil Service—Some 70 government departments each year hire thousands of fresh college graduates to help provide various types of public service. "The demand for graduates in civil service is so great that it is almost impossible to meet it," Wirtz said.

Business Administration—Many openings in the field of business administration, particularly in the field of sales, marketing, and management.

Public Relations—Many openings in the field of public relations, particularly in the field of advertising and public relations.

Education—Many openings in the field of education, particularly in the field of teaching and research.

Liberal Arts—Many openings in the field of liberal arts, particularly in the field of history and literature. "The demand for graduates in liberal arts is so great that it is almost impossible to meet it," Wirtz said.

Little Kentucky Derby Weekend '63

All Campus Sing Winners

They're Ahead! . . . They're Behind!

'It's All Yours!'

'I Know They're Going Too Fast'

'Wish I Had A Horse'

Tipins

By Mike Smith

Next Saturday afternoon at approximately 4:10, the 89th Kentucky Derby will be history. All the glamour and color will be over for another year.

All 88 derbies have had their exciting moments. But some of those during the past decade must rate close to the top in thrills and excitement. Here is a recap of the last 10.

1962—Favored Sir Gaylord was injured during his last workout. On Derby Even a gray named Decidedly came from behind to collar Roman Line and Ridan in the final sixteenth of a mile.

1961—The ugly duckling, a stable boy looking little horse purchased for a measly \$200,000, topped the Derby. Look theal sports fans ever will be talking about the underdog and the finish line. Calumet Farm's Secretariat, a 15-year-old, set the pace until the wire, but he was overtaken by a 10-year-old, Secretariat, who won by a mile.

1960—The Derby was won by a 10-year-old, Secretariat, who won by a mile. He was the first horse to win the Derby in 10 years. Secretariat was the first horse to win the Derby in 10 years. Secretariat was the first horse to win the Derby in 10 years.

1959—At the turn for home and down the final stretch they thundered with Sword Dancer and Tom Lee running neck and neck all the way. First Landing, the favorite, could do no better than third as Tom Lee survived a photo and an inquiry in which Sword Dancer's mount, Bill Boland, claimed his colt had been severely lamed.

1958—Silky Sullivan vaulted out of the gate, admired the crowd, and when he realized it was time to make his last minute dash, Tim Tam was home with another win for Calumet Farm. Silky ran number 12 in a field of 11.

1957—Probably the wildest finish since Brokers Tip beat Head Play in 1933 took place as Willie Shoemaker, his horse in front, stood up on Galant Man a 16th of a mile from the finish. This was just long enough for Calumet's Iron Pledge to stick his nose in front.

The night before the race, Mrs. Gene Markey said if General Duke, the early favorite, couldn't run then her Calumet Farm wouldn't have a prayer with only Iron Pledge going. General Duke was withdrawn the following morning.

1956—A favorite was the winner. Needles, a Florida-bred colt, came from 10th place to overtake Labias by a scant half-length.

Come On Red, long but in the race, was going to win if the track hadn't been muddy. It was a beautiful day and the crowd was huge. The race was exciting, the crowd was huge, and the track was muddy.

1955—Quietly, as usual, took place in the 1955 Derby. Secretariat, a 15-year-old, won the Derby. Secretariat was the first horse to win the Derby in 10 years. Secretariat was the first horse to win the Derby in 10 years.

1954—A 10-year-old, Secretariat, won the Derby. Secretariat was the first horse to win the Derby in 10 years. Secretariat was the first horse to win the Derby in 10 years.

1953—"Hey mister," a small boy playing in the grass called. "Want a tip on the Derby? Nope—Native Dancer ain't gonna win it! Dark Star."

Recipient of this tip was A. G. Vanderbilt, owner of the fabulous Native Dancer. This horse was destined to greatness from the very beginning, winning his first 11 with ridiculous ease.

During his career the Dancer won 21 of 22 races. But the streak was broken the first Saturday in May when a 21 to 1 shot named Dark Star broke on top and never faltered.

Native Dancer came like a tornado during those last few yards but lost by a neck in his attempt to become the Derby's first gray champion.

While Dark Star returned \$51.89 for a two dollar win ticket, Native Dancer returned the all-time low of \$2.29 to place and \$2.10 to show.

UK Students Back Candy Spots; Chateaugay, Never Bend Picked

University of Kentucky students varied from 30-1 shot Rajah Nuer to even money favorite Candy Spots on their Derby elections.

The following were asked to give their three top choices as to the outcome of Saturday's Kentucky Derby.

Bill Baker, an Arts and Sciences senior from Alexandria, La.: 1. Candy Spots; 2. Candy Spots; 3. Never Bend.

Jon Fisher, an Arts and Sciences senior from Lexington, Ky.: 1. Candy Spots; 2. Candy Spots; 3. Never Bend.

Tom Deery, an Arts and Sciences senior from Lexington, Ky.: 1. Candy Spots; 2. Candy Spots; 3. Never Bend.

Charles Anderson, an Arts and Sciences senior from Lexington, Ky.: 1. Candy Spots; 2. Candy Spots; 3. Never Bend.
